

27 - Criar Medidas Complexas: Parte 2

1 Clique em "+" e "Count Distinct Measure"

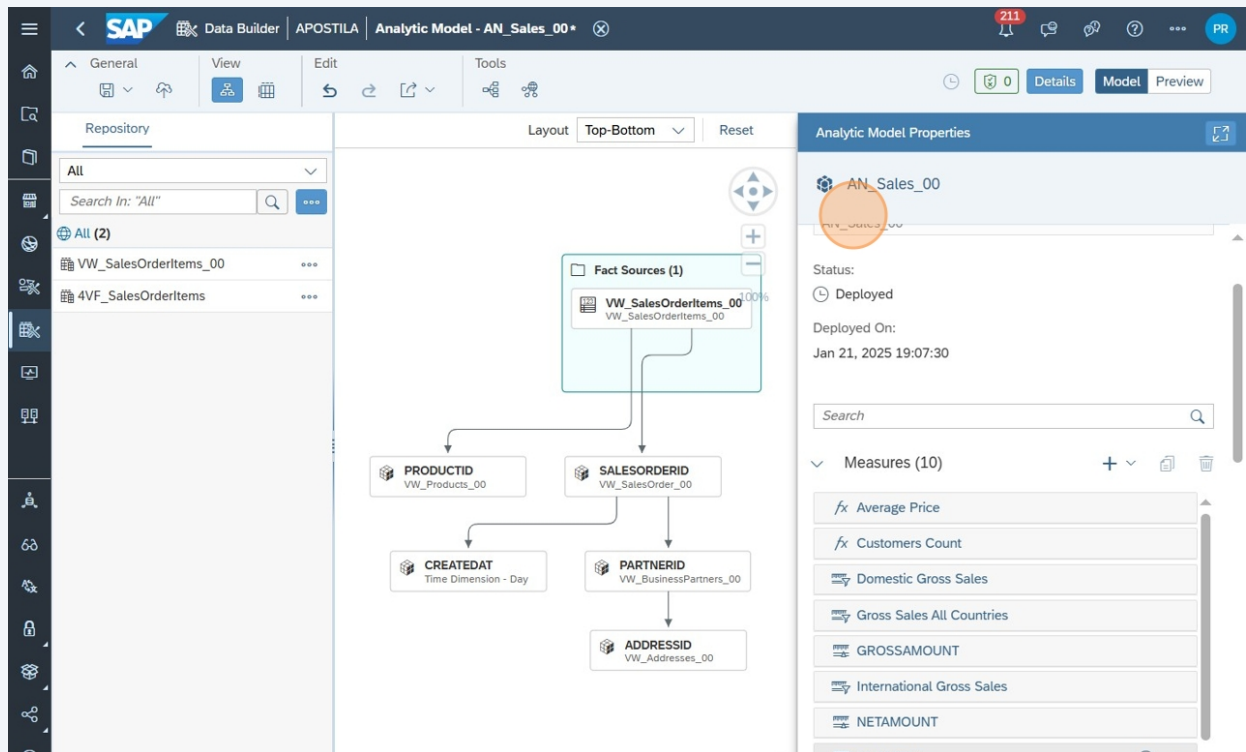

2 Em Business Name, entre com o valor "Customers Count"

The screenshot shows the SAP Data Builder interface for the 'Analytic Model - AN_Sales_00'. The central diagram illustrates the data model with 'Fact Sources (1)' containing 'VW_SalesOrderItems_00'. This fact source is linked to dimensions: 'PRODUCTID' (VW_Products_00), 'SALESORDERID' (VW_SalesOrder_00), 'CREATEDAT' (Time Dimension - Day), 'PARTNERID' (VW_BusinessPartners_00), and 'ADDRESSID' (VW_Addresses_00). On the right, the 'Analytic Model Properties' panel is open for the 'Count Distinct Measure'. The 'Business Name' field is highlighted with an orange circle and contains the text 'Count Distinct Measure'. The 'Technical Name' is 'Count_Distinct_Measure'. The 'Attributes' section is expanded, and the 'Dimensions' dropdown is currently empty.

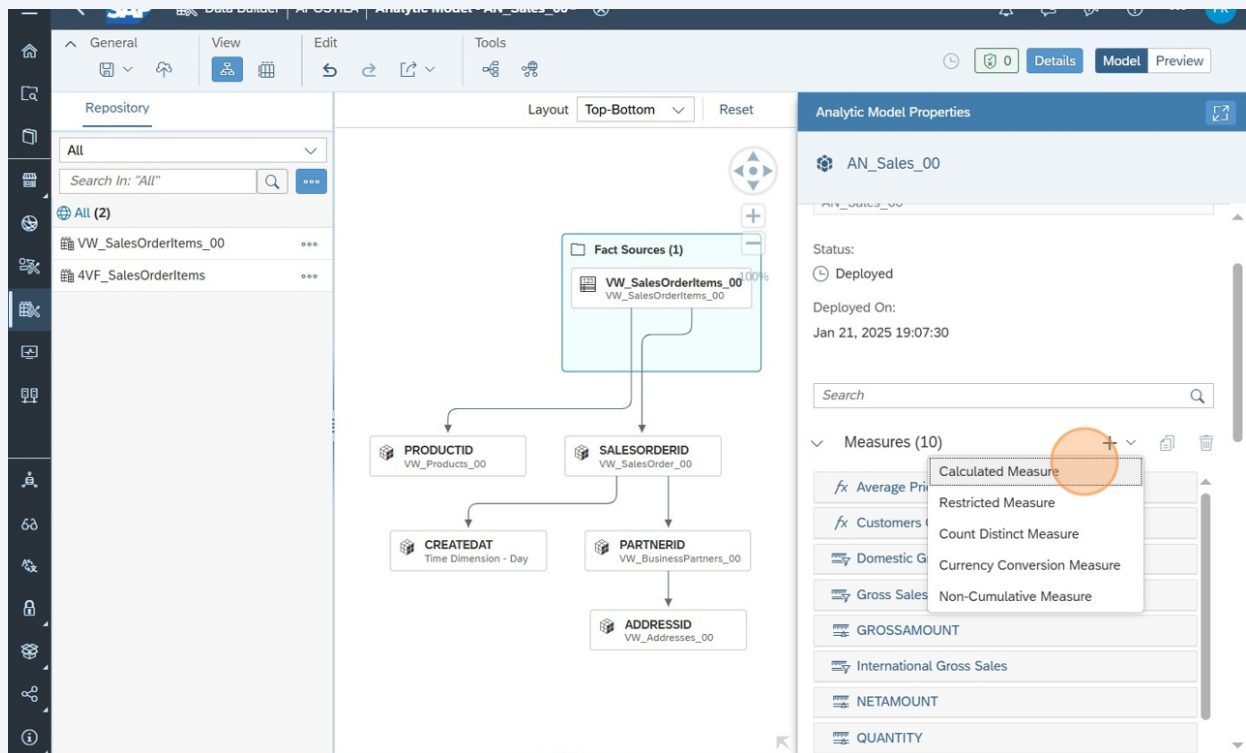

3 Altere Dimensions para "PARTNERID (SALESORDERID)"

This screenshot shows the same SAP Data Builder interface after modifications. The central diagram remains the same. In the 'Analytic Model Properties' panel, the measure is now named 'Customers Count'. The 'Business Name' is 'Customers Count' and the 'Technical Name' is 'Customers_Count'. Under the 'Attributes' section, the 'Dimensions' dropdown is now populated with 'PARTNERID (SALESORDERID) x PARTn'. An orange circle highlights this dropdown. Below the dropdown, a red warning message states: 'The Count Distinct measure "Customers_Count" has no attributes; assign at least one attribute'. The checkbox for 'PARTNERID (SALESORDERID)' is checked. The 'Used in (0)' section at the bottom indicates 'Measure is not being used.'

4 Clique em "AN_Sales_<SEU ID>" para retornar

5 Clique em "+" e "Calculated Measure"

6 Em Business Name, entre com o valor "Average Spend per Customer"

7 Utilize a Expression "GROSSAMOUNT / Customers_Count"

The screenshot shows the Power BI Desktop interface with the 'AN_Sales_00' analytic model. The 'Expression' field in the 'Analytic Model Properties' pane is set to 'GROSSAMOUNT / Customers_Count'. A red error message is visible: 'Mismatched <OP>, expecting <Boolean>, <Identifier>, <Number>, <QuotedLiteral>, <String>, <Table>, <Case>, <Cast>, <New>, <Null>'. The 'Measures (10)' list shows 'Customers_Count' as a calculated measure.

8 Clique em "Deploy"

The screenshot shows the Power BI Desktop interface with the 'AN_Sales_00' analytic model. A 'Deploying...' dialog box is displayed over the model diagram. The 'Measures (11)' list in the 'Analytic Model Properties' pane shows 'Average Spend per Customer' as a calculated measure.

9

Click "AN_Sales_00"

The screenshot displays the SAP Data Builder interface for an analytic model named "AN_Sales_00". The interface is divided into several sections:

- Repository:** Located on the left, it shows a list of data sources including "VW_SalesOrderItems_00" and "4VF_SalesOrderItems".
- Layout:** The central area shows a "Top-Bottom" layout of the analytic model. It includes a "Fact Sources (1)" section with "VW_SalesOrderItems_00" as the source. Below this, there are dimension tables: "PRODUCTID" (VW_Products_00), "SALESORDERID" (VW_SalesOrder_00), "CREATEDAT" (Time Dimension - Day), "PARTNERID" (VW_BusinessPartners_00), and "ADDRESSID" (VW_Addresses_00). Arrows indicate the relationships between these tables.
- Analytic Model Properties:** On the right, this panel shows the model's status as "Deployed" and the deployment time as "Jan 21, 2025 19:07:30". It also lists 11 measures, including "Average Price", "Average Spend per Customer", "Customers Count", "Domestic Gross Sales", "Gross Sales All Countries", "GROSSAMOUNT", and "International Gross Sales".

A "Deploying..." dialog box with three blue dots is overlaid on the central layout, indicating the current state of the model.
